PRINCIPAL'S DESK

Greetings,

School – the place of education.

The word Education is not confined for a prescribed printed textbook. It's quite vast, as it has the connectivity with the overall development of every child into a powerful human being with strong mentality and matured morality.

School refines ignorant children into responsible citizens of the country.

Every individual has to fight his own battle in this world. Apart from strengthening him/her in academics, the school has to prepare him as an allrounder to face the society and to emerge as a complete human being. It's a great commitment for every individual educator to monitor every child, to get to know his strength & weaknesses and to shape him accordingly.

The prime victory of a school begins by inculcating the values like honesty, optimism, perseverance, compassion and so on. These values will direct every child towards self evaluation as a result his self esteem is raised and so he becomes an asset to both the family and society.

YOU ARE RESPONSIBLE FOR YOURSELF

From the moment we are born, our parents nurture and protect us. During our school years, both teachers and parents continue to guide, support, and shape us. However, once we step into college, the responsibility for our lives gradually shifts onto our own shoulders. Every success or setback we experience becomes the result of our own choices, actions, and efforts.

Too often, we have the habit of blaming others for our mistakes or failures. For instance, when we drop a pen, we tend to say, "My pen fell down," instead of acknowledging, "I dropped my pen." This small example reflects a larger truth – our natural tendency to shift responsibility instead of owning it.

True growth begins the moment we start accepting accountability for our actions. Taking ownership builds character, resilience, and self-confidence. It also brings genuine happiness – the kind that comes only through one's own hard work and perseverance. Imagine buying a bunch of flowers from a florist – it may look beautiful, but the joy fades quickly. On the other hand, if you grow a plant at home and nurture it daily, the happiness you feel when the first flower blooms is incomparable. That joy comes from responsibility, effort, and care – from knowing that you made it happen.

Key Takeaways

Stop blaming others – Accept your mistakes and learn from them.

Stop complaining – Focus on finding solutions rather than pointing out problems.

Never stop trying – Consistent effort, even in the face of failure, leads to success.

Do not settle for the first obstacle – Treat challenges as opportunities for growth.

Rise, reflect, and reform – Continuously improve yourself with every experience.

Boost your confidence – Believe in your abilities and trust your journey.

Reduce stress – Take control of your life instead of worrying about what you can't change.

Face your problems head-on – Don't hide from difficulties; overcome them with courage.

Always Remember, as stated by Hal Elrod
The moment you take responsibility for everything in your life is the moment you gain the power to change anything."

மாதாபிதா குரு தெய்வம்.

Mother comes first in the order. Mother plays a vital role in shaping the child. She has to teach the child from 0-3 years. This period is called as an infant stage. The child develops all sort of growth & development in the early stage. The mother should provide good & healthy food to the child. She is the first teacher to take care of the needs of the child. Hence my suggestion is Mother must be well educated & an all-rounder.

UNDERSTANDING MODERN KIDS: SUGGESTIONS FOR PARENTS

Nowadays, kids are very active, brilliant, and smart. They learn everything easily with the help of technology and often possess more knowledge than their parents.

At the same time, many children lack patience and tolerance. In my opinion, we can help to change their attitude through parental love and understanding.

Parents should patiently listen to their children's opinions and spend quality time with them. By doing these small but meaningful things, we can shape a wonderful future generation.
